FROM THE DIRECTOR'S DESK

"Education is not the learning of facts, but the training of the mind to think"

These profound words by the great Albert Einstein are the bedrock on which our school's philosophy rests. The spirit of the school is its infrastructure, the management, students, and staff who work unitedly to make it a living and breathing entity. All our efforts, our work and our endeavours revolve around providing wings to each and every student's potential be it academic, social or emotional level.

At Vatsalya preschool, we have consciously created a welcoming ecosystem where nature, knowledge and compassion are in abundance and synergy with each other. A student is well rounded with a global outlook, resilient in nature with a strong determination to be the best version of themselves. It has been the school's strong belief that inculcating interest in other domains of learning is essential to develop an expansive world view.

Sports and creative activities inculcate skills and impact learning that cannot simply be learnt from a book. Together, a holistic approach to education is what shapes a person, preparing them to forge their own path in life and take forward those around them, we will continue to strive to sustain an environment, where opportunity, guidance, and ultimately success knows no bounds. We believe that our dreams are achievable because our students are an integral part of our Growth journey. We proudly invite you to visit us to explore our facilities and look forward interacting with you on new horizons and possible initiatives as we progress towards creating a bright and progressive future for our young generation.
